STRUCTURE AND ACTIVITIES

Akhela was born in 2004 from the merger of several IT and electronics companies of Saras Group, inheriting the important cultural fund of the companies from which it was originated. Akhela manages, among others, production and information systems of Saras refinery, one of the most important high conversion supersites in Europe. As a result of this activity, Akhela has developed a wealth of competencies and procedures and a company culture whose reference points are logical and physical security and business continuity of the supplied services. A strong competence in design and development of embedded systems completes the offering.
